

Welcome to the Practice

Integrity, compassion and a commitment to patient care are the driving forces behind California Face and Laser Institute. Hundreds of patients each year seek the expertise of our surgeons, not only for their extensive knowledge, but also for our “patient-centered” approach to medicine.

We believe that the key to any medical procedure is listening to our patients and putting their needs first. Our team is thoroughly trained on this unique approach to health care and offers the highest quality of patient care available.

Our office is modeled around this “patient-centered” approach and has become a friendly and inviting oasis where you can feel safe, comfortable and at ease. We believe that a surgeon should be more than just a provider of care for his patients, and that he should be a guide, a friend and a partner through any treatment his patients are having.

As a partner in your procedure, CFI physicians understand that a critical role to your recovery is his availability and attention to your care, and they pledge to be available for you.

Our goal is meeting or exceeding all expectations. We strive to provide for our patients’ complete comfort and satisfaction, earning their enduring confidence and loyalty.

CFI surgeons are board certified by both the American Board of Otolaryngology – Head and Neck Surgery (the study of the ear, nose and throat) and the American Board of Facial Plastic

and Reconstructive Surgery. Their unique paths of training have provided them with an in-depth knowledge of internal and external structures of the face and neck. Their surgical expertise and aesthetic touch is sought-after by patients throughout Northern California and beyond.

The CFI physicians work to ensure their patients not only look better, but feel better as well. Our goal is to apply an expert knowledge of the inner workings of the structures of the nose and face to achieve his patients’ rejuvenation goals and impact both inside and out, which will help improve their quality of life. Our passion for our work and our commitment to the betterment of his patient’s lives have made CFI one of the nation’s leading facial plastic and reconstructive surgery centers.
